

Appl. No. 09/695,645
Amdt. dated July 6, 2005
Reply to Office Action of September 20, 2004

Remarks

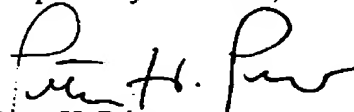

The present supplemental amendment corrects a typographical error in the Cross-Reference to Related Applications section of the specification.

Amendments to the Specification

The paragraph under Cross Reference to Related Applications has been amended to correct a typographical error. The originally filed specification correctly listed the titles of the related applications, but did not provide their serial numbers, which were not available at the time of filing. In the amendment dated February 14, 2005 which provided a correction for the addition of serial numbers, one of the referenced related applications was inadvertently changed to the title of the present invention with its associated serial number.

The present amendment corrects the error, referencing the related application as originally filed with the addition of the associated serial number.

Respectfully submitted,

Peter H. Priest
